Ansik Aryan Samal

AI Engineer Intern & Full-stack Developer
aryanansik@gmail.com · Hyderabad, Telangana, India

PROFILE

I build AI tools and full-stack applications with Python, JavaScript and SQL. My work spans a client stock screener, job authenticity checks and secure financial APIs. I'm an AI Engineer Intern at Clyptus Software Solutions in Hyderabad, pursuing Data Science and Artificial Intelligence with IIT Roorkee and Masai School.

SELECTED WORK

Stock Screener SaaS (EquityIQ). A client product taken from requirements to a custom-domain launch.

Job and Company Verification. Job-link checks using company reviews, online presence and posting warning signs.

Finance Data Processing Backend. REST APIs for users, transactions and financial reporting.

Secure Image Messaging. Text messages encoded into images and decoded by the receiver.

Stock Price Prediction. Price-trend estimation from historical and real-time market data.

PROJECT OUTCOMES

Stock Screener: 5,300+ stocks (résumé-reported); 17.48k pageviews on Cloudflare, 3 October to 2 November 2026. Job authenticity tool: 95% unseen-data accuracy (résumé-reported). In progress: Text-to-SQL Analytics Copilot and Secure Note-Sharing Application.

CORE SKILLS

Python, JavaScript, TypeScript, SQL, React.js, Node.js, Express.js, Flask, FastAPI, PostgreSQL, MongoDB, Scikit-learn, RAG, prompt engineering.

EDUCATION

B.Tech, Computer Science and Engineering, Institute of Aeronautical Engineering (JNTUH), Dundigal, Hyderabad. 2021 to 2025. CGPA: 7.83/10.

Data Science and Artificial Intelligence, IIT Roorkee and Masai School. Ongoing, 2026.

AVAILABILITY & WORK REQUIREMENT

Availability: Available during November 2026, subject to organisational needs, and immediately if required. The $3,000 answer: $3,000 is about ₹2,80,000 in India. I would spend about 40 to 50% on a new smartphone, wired earphones and essential accessories, and possibly a high-end laptop if my Wispr Flow work needs one. Otherwise, I would save the remainder toward a better future device.
