PROFESSIONAL SUMMARY

Computer Science graduate (B.Tech, 2025, CGPA 7.83) and full-stack developer with hands-on experience in React.js, Node.js, Express.js, Python and SQL databases. Built REST APIs with role-based access control, took a client SaaS product from requirements to launch (about 10,000 views in 3-4 months), and developed a machine learning-based job authenticity tool with 95% accuracy on unseen data. Currently completing a Data Science and Artificial Intelligence program with IIT Roorkee and Masai School, with practical experience in prompt engineering and retrieval-augmented generation (RAG).

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, SQL, Java, C++, C, Bash
Front End: React.js, HTML, CSS, Tailwind CSS, HeadlessUI, TanStack, responsive design, client-side routing
Back End and APIs: Node.js, Express.js, Flask, FastAPI, RESTful APIs, WebSockets, authentication (Passport.js, bcrypt), role-based access control (RBAC)
Databases: PostgreSQL, MySQL, MongoDB, Supabase, Redis; data modelling, query optimization, SQL for data retrieval, cleaning and reporting
AI and Machine Learning: Scikit-learn, regression, classification, feature engineering, reinforcement learning, Hugging Face inference models, Stable Diffusion
Generative AI: Prompt engineering (one-shot, few-shot, chain-of-thought, role-based prompting), retrieval-augmented generation (RAG); learning large language models (LLMs) and Model Context Protocol (MCP)
Data Science and Analytics: Pandas, NumPy, Matplotlib, Seaborn, exploratory data analysis (EDA), data cleaning, statistical analysis, trend analysis, Power BI, Tableau, Microsoft Excel
Developer Tools and Deployment: Git, GitHub, Postman, Docker, Linux, VS Code, Jupyter Notebook, MySQL Workbench, unit testing; deployment on Railway, Render, Vercel and Cloudflare (custom domains)
AI-Assisted Development: Cursor, Claude Code, Lovable, Emergent, Replit, ChatGPT, Perplexity
Computer Science Fundamentals: Data Structures and Algorithms, object-oriented programming (OOP), SOLID principles, software development life cycle (SDLC), encryption, cybersecurity basics
Currently Learning: Cloud deployment, CI/CD (automated testing and releases), low-level design (LLD), caching
Professional Skills: Analytical thinking, problem solving, logical reasoning, critical thinking, communication, teamwork, adaptability, leadership

PROJECTS

Stock Screener SaaS Web App (Client Project) | React.js, Tailwind CSS, Node.js, Flask, Axios, MongoDB

- Translated a client's requirements into a customizable stock screener covering 5,300+ NSE and BSE stocks, with live prices, watchlists, portfolio tracking and real-time analysis.
- Defined Free, Pro ($20/month) and Premium ($40/month) plans with discounted yearly rates, and tied features such as stock search, number of watchlists and automatic price refresh to each plan.
- Determined the pricing and payment integration approach and wrote the project documentation.
- Launched on a custom domain through Cloudflare, reaching about 10,000 views in 3-4 months.

Finance Data Processing Backend | Node.js, Express.js, PostgreSQL

- Developed secure REST APIs for user management, transactions and dashboard reports.
- Implemented role-based access control with three permission levels: Viewer, Analyst and Admin.
- Created endpoints that report income, expenses, balances and spending trends.
- Optimized database schemas and queries so dashboard summaries load quickly in real time.

Job and Company Verification Tool | Python, Flask, React.js, TypeScript, Supabase, Tailwind CSS, TanStack, Firecrawl

- Engineered a tool that checks a single job link, gathers company reviews and online presence data through Firecrawl, and flags warning signs in the posting.
- Assigns each job an authenticity score from 0 to 100, reaching 95% accuracy on unseen data.
- Delivered the first version with a Flask REST API, a nine-signal weighted scoring system, a unit test suite and a 39-page PDF report (ReportLab), deployed on Render, Railway and Vercel.
- Introduced a bulk self-training feature that trains the model on batches of 30-40 company links, with predictions verified through Firecrawl.
- Rebuilt the app around an in-house machine learning model that classifies job listings, after applying feature engineering learned in the Data Science course.

Secure Notes Sharing App (In Progress)

- Building a note-taking application where users create notes and share them through restricted links.
- Protecting notes from unwanted viewing, with user-defined expiry settings for shared links.
- Enforcing access control and privileges to determine who can open each note.
- Developed an in-house URL shortener to create compact note-sharing links.

Secure Image Messaging App | React, Flask, Tailwind CSS

- Designed a web app that encrypts text messages into image files and decrypts them for the receiver.
- Applied pixel-based encryption to secure data transmission.
- Added dark mode and client-side routing to a responsive React and Tailwind CSS interface.

Stock Price Prediction Tool | Python, Pandas, Scikit-learn, Yahoo Finance API

- Developed a price trend estimation tool using historical and real-time market data from the Yahoo Finance API.
- Cleaned and analyzed 5,000+ data points per stock, applying feature engineering to surface patterns and trends.
- Estimated price trends using statistical and machine learning techniques.

WORK EXPERIENCE

Edunet Foundation (IBM SkillBuild) | Cybersecurity Intern | 15th January 2025 - 26th February 2025

- Learned core cybersecurity concepts, network security and threat mitigation techniques.
- Studied steganography methods for hiding and retrieving data within images using bit-level manipulation.
- Built an interactive GUI application that encodes and decodes hidden data within image files.

NxtWave Disruptive Technologies | Associate Aptitude Instructor | 24th August 2026 - 13th October 2026

- Trained to teach quantitative aptitude and math modules for computer science learners accurately and clearly, following company guidelines and ethics.
- Worked in a corporate setting with limited resources, staying punctual and raising issues early with the team.

EDUCATION

Institute of Aeronautical Engineering (JNTUH), Dundigal, Hyderabad | B.Tech, Computer Science and Engineering | 2021 - 2025 | CGPA: 7.83 (out of 10)
Trividyaa Junior College, Hyderabad | Intermediate (MPC) | 2019 - 2021 | 98%
St. Michael's School, Old Alwal, Hyderabad | Secondary School | 2018 - 2019 | 94%

CERTIFICATIONS

- Data Science and Artificial Intelligence | IIT Roorkee and Masai School | Ongoing, 2026
- Python, SQL and Problem Solving | HackerRank
- Web Development (WD101) and Node Development (WD201) | Pupilfirst (AICTE-based curriculum)
- SEBI Investor Awareness | SEBI/NISM | 2025
- In preparation: Oracle AI, Microsoft Fabric Analytics Engineer, Anthropic, and Google AI and Cloud certifications

ACHIEVEMENTS AND LEADERSHIP

- Selected through the **University of Hyderabad (UoH)** entrance examination; ranked 162nd in the Common Rank List (CRL) and 4th in the Armed Personnel Category.
- Event Manager, Entrepreneurship Cell (E-Cell), **IARE**, for the National Entrepreneurship Challenge (NEC) E-Summit 2024 at **IIT Bombay**; the team's startup pitch ranked 4th in India.
- Pitched a job-matching app for daily-wage and off-season workers, with regional language support, salary negotiation help and planned tie-ups with government welfare schemes for fair wages.
- Scored 95.2 percentile in **JEE Mains 2021**.
- Qualified for the final mock interview round in **LEEE 2023**.
